Welcome to The Ocala Map Experience. The one stop shop for all your Ocala GIS Data Needs.

- Check out the data displayed in 5 easy to use maps that have their designation layers.
- All maps have some layers on by default, but more layers can be turned on in the Layer list.
- Simply check the box next to the layer or layer group and it will display. All layers under a layer group are turned on so all you need to do is turn on the root of the layer to see all data relevant to that layer group.
 - If the layer's name is greyed out, you need to zoom in to see it.
 - Clicking on the three lines to the right of the layer will show the legend for that layer.
 - \circ $\;$ You can turn the labels off certain layers that have the label tag next to it.

Layers	$\times \times$

	City Fire Stations	≡ 🔗					
	Police Stations						
	Hospitals	≡ ⊘					

- Clicking on a feature in the map will show more detail about the layers that are on.
 - Click the right arrow in the top or sometimes the bottom of the box to scroll through the results for all layers that are on.

• Search for your property by parcel number, owner name, or address using the search bar located on the top left of the map.

• Each parcel links to Google's aerial imagery as well as street view. We also have the Property Appraiser Record, and the County Record links there as well.

Here is a <u>walk-through video</u> we put together that may also help.

For further assistance contact <u>GIS@Ocalafl.gov</u>.
